

Prevent Revenue Loss

Improve User Experience

by Saving Money

- Average cost of network downtime: **\$300,000** per-hour saved with network visibility (Gartner)
- App crashes drop **50%** with full transaction and network visibility (Forrester)
- MTTR slashed by **65%** with real-time service and network dependency-mapping (IDC)

by Generating Money

- **87%** of firms profit from network data—enabled by visibility. Each **\$1** spent on network visibility generates \$4.30 in ROI—via bandwidth, uptime, and SLAs. (IDC)
- Apps gain performance increase by **40%**—network visibility pinpoints latency/errors. (Forrester)
- SLA compliance jumps to **99.9%** due to real-time service and network monitoring. (Gartner)

ROI of NEOX Network Visibility Platform

Help Save Money

- Deploy proactive Network Visibility and Forensics for spotting Performance and Security loopholes.
- Access, consolidate, and forward Network Packet, Flow, and Log metadata for monitoring.
- Troubleshoot User Experience issues faster and reduce MTTR through key metrics, correlation, and visualization.

Help Generate Money

- Accelerate Digitization and Modernization through Hybrid-Cloud Observability and Security
- Keep Network Monitoring at par with infrastructure upgrades in terms of performance and processing speed.
- Stay Compliant through faster network data acquisitions and archive as you expand.
